PROJECTS

PWR Apps platform & Apps Market

- PWR Apps Platform is the app development platform to built custom applications with majorly utilizing drag and drop. we do not have to be a developer to build apps using the PWR Apps Platform. It is the platform where you can design your application layout and create your own schema for the application.

- Apps Market is a marketplace where a user can publish his/her application which is created in the PWR Apps to make his/her own application publicly available to potential customers. So that anyone can use the application on subscribing the application.

Online test evaluation

- Online test evaluation is the application for creating assessments to check on an individual's knowledge and skills. The test will automatically generates the result of the test after its completion.

Performance appraisal management

- Performance appraisal management system measures the employee performance based on the ratings given by their team members. The ratings will be based on the parameters as per the department.

PWR Timesheet

- PWR Timesheet application can record the start and end date of tasks. It contains a detailed breakdown of tasks accomplished throughout the project. You can log details of each task and track all from a single place in a timesheet system. Time management in a project can be done by logging time daily or weekly.
